

## Automotive Capabilities

**HS Spring is an industry leader in providing the best quality spring products, assemblies and services. We specialize in developing and manufacturing constant force springs, counterbalance springs, wire forms, slide form parts, small stampings and assemblies. Our products are used for a variety of automotive applications including reclining seats, window regulators, hood hinges, semi-truck bed covers and cargo shade mechanisms.**

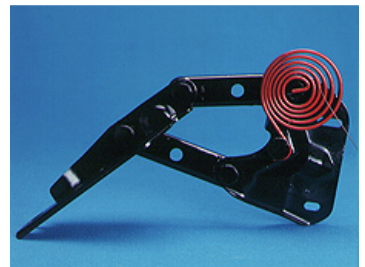

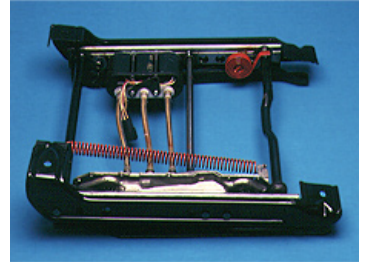

We take pride in responding to customers by providing unique prototyping, product development and scalable solutions. Our innovative engineering team will work closely with you from concept through production to ensure that we provide the exact product you need. From quoting, to order processing, to prototyping, to manufacturing, to delivery – service is the top priority for the entire staff.

***Bring us your ideas and we will bend them into reality.***

## Automotive Services

**There are many spring manufacturers, but only HS Spring puts these unique attributes to work for you.**

- HS Spring has over 50 years of proven experience and technical expertise needed to properly manage projects from start to finish:
- The most advanced CNC equipment to deliver the highest levels of quality and reliability. Full in-house tooling capabilities.
- Metal forming and fabricating including slide and wire forming, presses for small and medium stamping, riveting, stress relieving and assembly capabilities.
- Finishing, such as grease and other lubricants; fluorocarbon resins; phosphate and soap; dyes, paints and Lock Lube #5; phosphate and oil coating; e-coating.
- From short runs to complex, high-volume jobs, your project benefits from the advancements made possible by our research and development professionals.
- Serving the global market with clients in Europe, the Pacific Rim, India and Mexico.
- Quality certifications include QS 9000 and ISO 9001: 2002.
